# BULL SALE

100 2-YEAR-OLD ANGUS BULLS

FEBRUARY 23<sup>RD</sup>, 2017

STETTLER AUCTION MART, STETTLER, AB

ENGINEERED TO BREED MORE COWS & BUILT TO LAST

# TERMS *and* CONDITIONS

**SALE DATE | FEBRUARY 23, 2017**  
**SALE DAY PHONE | 403-742-2368**

## *Sale Professionals*

Don Raffan, Auctioneer	250-558-6789
Joe Ferris, Ring Staff	250-558-8745
Jim Abel, Buyer Rep	403-742-2368
Blake Chapman, Buyer Rep	403-741-5760
<b>Peter Raffan</b>	250-260-0758
<b>Gary Rairdan</b>	403-740-6823

## *Bids*

Buyer may call or send their bids to any of the sale professionals listed above or directly to Chapman Cattle Company. Complete satisfaction is guaranteed for cattle purchased sight unseen as well as all bulls sold.

## *Sale Location*

Stettler Auction Mart, Stettler, Alberta.

## *Terms & Conditions*

All cattle sell under the standard terms and conditions of the Canadian Angus Association. Terms of the sale are cash, payable on Sale Day unless prior arrangements have been made with Chapman Cattle Company.

## *Insurance*

Ownership risk to purchaser commences when the Auctioneer's hammer falls. All cattle returning to Chapman Cattle Company must be insured. Although all precautions will be made for the well-being of your cattle until possession has transferred, Chapman Cattle Company will not be liable for any sickness, injury or death that causes loss of use of the specified cattle. A Livestock Insurance agent will be available Sale Day to discuss your coverage options.

## *Announcements*

All announcements from the sale block on sale day take precedence of any printed material.

## *Food*

Coffee and donuts in the a.m. Lunch will be prepared and served starting at 12:00pm.

## *Hotels*

Canalta Hotel, Stettler	403-742-3371
Ramada Inn, Stettler	403-742-6555
Super 8 Motel, Stettler	403-742-3391
Heartlander Motel, Stettler	403-742-3401

## *Liability*

All persons who attend the sale do so at their own risk and the owners, management, and Sale Day staff assume no liability, and disclaims all liability, legal or otherwise, for any reason.

## *Health*

All sale bulls have been vaccinated twice with Vision 8 Somnus and Vista Once; boosted with Bovishield Gold; treated with ivermectin and Safeguard; supplemented with MultiMin 90 and Vitamin A/D, fertility tested and guaranteed sound.

## *Storm Date*

**FEBRUARY 24, 2017 – 2:00pm – Stettler Auction Mart.**  
**In the event of a weather event, updates will be posted at [www.chapmancattle.com](http://www.chapmancattle.com) or call the Stettler Auction Mart 403-742-2368 or Silas Chapman 403-741-2099.**

## *Delivery*

**Upon Settlement, please choose one of the following options and inform the clerk at the time of settlement.**

Please leave detailed delivery instructions upon doing so.

- A. \$50 Discount off of the Total Invoice per buyer if bulls are picked up Sale Day
- B. \$50 Discount off of the Total Invoice per buyer if bulls are picked up from Chapman Cattle Company within a week following the sale.

Every attempt will be made to deliver your new bull(s) to your bull pen commencing after the sale and will be done at the expense of Chapman Cattle Company for bulls selling within the Prairie Provinces and BC. All bulls going beyond will be delivered at cost. Chapman Cattle Company assumes no liability of death or injury for bulls returning to the ranch. All bulls MUST be insured.

**Silas Chapman**  
phone: (403) 741-2099  
silas@chapmancattle.com

### **Sight-Unseen Purchases**

Can't make it to the sale? We guarantee you won't be disappointed in the Chapman 'Forage-Developed' bulls that you buy sight unseen. In fact, we sell many bulls across Canada every year this way. Our experience over the past 65 years is the sooner you contact us, the better we are able to match the right cattle to your specifications. When cattle purchased "sight-unseen" are delivered, the buyer has the right of refusal for any animals that are not as they were represented.

### **Guarantee**

We're confident that our 'Forage-Developed' bulls will meet and exceed your standards for longevity and performance. If for any reasons you're not satisfied with a bull you purchase from us, you don't have to pay – just call us for a prompt and courteous credit or refund.

### **Follow-Up and Consulting**

We are interested about your program too, your success, and the effectiveness of our cattle in your herd. Feel free to contact us at any time.

Call us at (403) 741-2099  
email us at [silas@chapmancattle.com](mailto:silas@chapmancattle.com)

# PROFIT

VERSUS

# PRODUCTION

*in the cattle business*

There is a tendency in the cow-calf business to put production before profit. I don't understand this tendency and certainly don't agree with it. Profit is essential if you want to stay in business. It is important to analyze our individual businesses and structure them for profit. Some of the areas we might analyze are: cow size, time of calving and cow-calf versus cow-long yearling. A business structured for profit in these three areas is likely to produce a profit in the short term and sustainability in the long term. The easiest place to see the production tendency is at your local auction market. It is interesting to watch people's reaction when a fat dry cow, a big calf or a heavy yearling comes through. The comments are: "Wow," and, "That one brought a lot of dollars." What is never asked is: "Did that animal generate a profit?"

Today's market is likely to lead to more emphasis on production. I think this would be an unfavorable outcome of our current situation. This is an ideal time to build profit into our businesses.

Let's look at cow size and profit (Chart 1). For this example we will compare three cow sizes: 1,200-lb., 1,500-lb. and 1,800-lb. cows. We will graze the cows for 165 days. Our summer pasture will be our limiting factor. Consumption will be three per cent of body weight. We begin with enough grass for 100 head of 1,500-lb. cows and then determine how many 1,200-lb. and 1,800-lb. cows we can carry using the same total amount of grass.

CHART 1. COW SIZE						
Cow weight	% BW	Grass/day lb.	Days	Grass/cow lb.	Cows	T grass lb.
1,500	3%	45	165	7,425	100	742,500
1,200	3%	36	165	5,940	125	742,500
1,800	3%	54	165	8,910	83	742,500

Chart 1 clearly shows that if we have enough grass for 100 head of 1,500-lb. cows we could carry 125 head of 1,200-lb. cows or 83 head of 1,800-lb. cows on the same grass. The choice is up to us. Now let's look at the number of calves produced and the income generated from these three herds. To compare the herds we will use a 90 per cent weaning rate. We will wean at 170 days of age. For the 1,500-lb. cows we will use a birth weight of 90 lbs. and a daily gain of three lbs. This will result in a weaning weight of 600 lbs.  $[(90 + (170 \times 3))]$ . For the 1,200-lb. cows we will use a birth weight of 85 lbs. and a daily gain of 2.5 lbs. This will result in a weaning weight of 510 lbs.  $[(85 + (170 \times 2.5))]$ . For the 1,800-lb. cows we will use a birth weight of 100 lbs. and a daily gain of 3.4 lbs. This will result in a weaning weight of 678 lbs.  $[(100 + (170 \times 3.4))]$ . We will use the WLPIP (Western Livestock Price Insurance Program) settlement average price for October 2014 as a base price. Using this information a 600-lb. steer will sell for \$2.76. I used Canfax average prices for October to determine the slide. The slide from 600 lbs. to 510 lbs. was \$27. The 510-lb. steer will sell for \$3.03  $(\$2.76 + \$27)$ . The slide from 600 lbs. to 678 lbs. was \$16. The 678-lb. steer will sell for \$2.60  $(\$2.76 - \$16)$ .

Chart 2 demonstrates that reducing our average cow weight from 1,500 lbs. to 1,200 lbs. will result in an extra 3,630 lbs. of beef produced. This is a seven per cent increase in pounds of beef  $(3,630/54,000)$ . This change will also result in an 17 per cent increase in income of \$25,579. All this is achieved using the exact same resources.

CHART 2.						
Cows	Wean %	Calves	Wean Wt.	Beef lb.	Price	Income
100	90%	90	600	54,000	\$2.76	\$149,040
125	90%	113	510	57,630	\$3.03	\$174,619
83	90%	75	678	50,850	\$2.60	\$132,210

This chart also shows that reducing our average cow weight from 1,800 lbs. to 1,200 lbs. will result in an extra 13 per cent or 6,780 lbs. of beef produced which results in a 32 per cent increase in income of \$42,409 from the same resources.

Increasing cow size from 1,500 lbs. to 1,800 lbs. has the exact opposite effect. Pounds of beef produced drops six per cent by 3,150 lbs. with an 11 per cent drop in income of \$16,830.

Things look pretty clear at this point. The smaller cows make significantly more money. But wait, someone is bound to ask: "What about all the income from those big cull cows." This is a valid point and needs to be considered. For this example we will cull 10 per cent of the cows each year. We have priced the 1,200-lb. cows at \$1.10, the 1,500-lb. cows at \$1.15 and the 1,800-lb. cows at \$1.20.

Chart 3 shows that decreasing cow size reduces cull cow income slightly. The next chart shows the total income for calves and cull cows.

**CHART 3. CULL COW INCOME**

Cow wt.	Cows	Cull %	# Culls	Lb./sale	Price	Income
1,200	125	10%	12.5	15,000	\$1.10	\$16,500
1,500	100	10%	10	15,000	\$1.15	\$17,250
1,800	83	10%	8.3	14,940	\$1.20	\$17,928

Chart 4 shows that reducing cow size from 1,500 lbs. to 1,200 lbs. will result in a 15 per cent increase in income while utilizing the same resources. Is there any other change you could make on your place that would increase income by this amount?

**CHART 4. SUMMARY**

Cow weight	Cows	Calf income	Cow income	Total income	Change
1,200	125	\$174,619	\$16,500	\$191,119	+15%
1,500	100	\$149,040	\$17,250	\$166,290	
1,800	83	\$132,210	\$17,928	\$150,138	-10%

Increasing cow size from 1,500 lbs. to 1,800 lbs. will result in a 10 per cent reduction in income while utilizing the same resources. I don't think that there is any doubt: smaller cows make more money when all the factors are considered. What cow size might be most profitable for you is your decision. If for any reason you like big cows you should continue on. If you want to focus on profit don't rely on my numbers. Use your own numbers to determine what cow size might be most profitable on your place. I wish you success in building a profitable cow herd.

# HELLO

from Chapman Cattle Company

Welcome to our 2017 bull sale and the next decade of Forage-Developed 2 Year Old Angus Bulls. Over the course of three generations and 67 years we have been developing and marketing two year old bulls focused entirely on the commercial cattle producer.

We had already been selling bulls for decades, but in the late 1990's, a shift was made to providing a more sustainable product. We wanted to provide cattle that were functional long term; cattle that would enhance the profitability of our customers as well as our operation. In 2007 we held our first annual 100% Forage-Developed Two Year Old Bull Sale. The welcome letter wrote Feb. 15/07 read:

"These bulls are designed to optimize, not necessarily maximize, and represent our commitment to providing you with the type of cattle that will add value and profitability. Our program demands reproductive efficiency, soundness, longevity and consistency in our cattle. We consider these to be the necessary traits for profitability in the cattle business."

To all those who have bought into the program we thank you! It is interesting to note there are still bulls from that first bull sale in 2007 that will breed cows in 2017!

As cattle producers, we all have access to the same bulls annually be it through annual sales or artificially. We have focused on maintaining somewhat of a closed herd, allowing the environment to sort through the genetic base we have, or have accessed, in order to determine the replacements we keep and the bulls we sell. This has resulted in a multi-generational product that is consistent and true in both genotype and phenotype. The end of the day our cowherd is our source of wealth and that is as important for our customers as it is for us.

The sale offering represents a cross section of proven genetics. All sires have daughters in, or coming into production this year, and all sires are owned by Chapman Cattle. The Rito sons offer trait leading growth and added capacity. The Memento's offer added efficiency and will fix udder structure. There is moderation and structure enhancement found in the Trendsetter sons; and if you are keeping replacement daughters or have heifers to breed, consider the Exquisites and Brokers – both from Pathfinder dams of time tested Emulation breeding.

This year the sale will be broadcast by DLMS in case you are unable to attend. We are confident in the genetic package we are selling on February 23, 2017 and are available 365 days a year to assist you with your purchases. Thank you for your interest and consideration.

*Gilas Chapman*

9R7 is a high capacity, wide based, thick made bull that is old line Rito, ensuring correctness and functionality. 9R7 weaned off his mother at 742 lbs and recorded a 365 day weight of 1355 lbs for a weaning and yearling ratio of 114 and 122 respectively. He has a classy, masculine beef bull look along with a wide, deep quarter and excellent scrotal development that he stamps into his sons with authority, yet leaving wedge-shaped, feminine daughters with extra rib shape. His first daughter to sell publicly commanded \$12,000 to Casa Branca Agropastoril of Argentina this fall. A search of the Angus database identifies 9R7 as one of eleven bulls with a birth weight EPD of 4.0 or lower, with an accuracy >80%, that are in the top 1% for WW and YW EPD's. 9R7 has been an excellent breeding bull, having naturally sired 360 calves in his 6 years here. A true herd sire sires sons better than himself and 9R7 does just that. Perennial favorites among ranchers - utilize 9R7 sons for added pay weight, capacity and structural soundness with the herd bull look.

A bull that hits the mark for individual performance & EPD's. He started out with just an 82 lb BW and weaned just shy of the 800 lb mark. Nice spread from a 0.7 BW to a +60 WW EPD. His pedigree combines the Trait leading growth of 9R7 with breed notables on the bottom side of his pedigree such as Lodge of Wye, Basin Max 602C, OCC Glory and Emulation 31. His dam is a personal favorite, is an excellent mother at birth and boasts a WR 6/111 with sons to Tomahawk & Walter Farms.

**Selling 1/2 Interest and Full Possession**

**“SIGHT-UNSEEN”**

**PURCHASE PLAN**

We would prefer to have everyone in attendance for sale day, but realistically we know there are scheduling conflicts and distance limitations. Regardless of the situation, we handle many sight-unseen bull purchases every year, and have successfully placed cattle into 6 provinces this way. Almost every one of those original sight-unseen purchases has resulted in repeat orders. In fact, of all the bulls sold sight-unseen, we have only had to bring 1 bull home! We know the cattle well, and realistically some of our customers prefer to allow us to select their bull power for them. Please contact Silas, to discuss your bull requirements.

**100% Satisfaction Guaranteed!**

Here is a maternal brother to the \$48,000 Memento 3589A to Crescent Creek in 2015. Not only does this bull have herd bull potential, but look at his individual numbers and the EPD spread from birth to yearling, with a milk EPD exactly where I like it. His dam will enter the embryo program in 2017 after achieving Association Elite status on just her four calves, and currently ratio's 6/110. His granddam, 434P, is a prolific Leachman Right Time daughter who will also enter the embryo program after earning a WR 10/107. His great granddam, 6171, was one of my favorite Walling cows to originate out of Winnifred, MT with a WR 10/102. The combination of the Trait leading growth of his sire 9R7 with a fabulous maternal blend of Right Time and OCC Legacy make this bull a leading candidate as a herd building sire.

0513X sold through our 2012 bull sale as one of the sale features to the good commercial Reimer herd in Carrot River, SK., and was repurchased to add to the quadruplicity of 8RL5 sons. 0513's donor dam was selected as a feature bred heifer in the 2006 Crowfoot Dispersal, posting individual weaning and yearling ratios of 105 and 126 respectively. She is moderate, sound in all four directions and has recorded weaning and yearling ratios of 107 and 101 on seven calves; with two sons retained and five daughters retained. 0513X sires wide muzzle, efficient cattle with good feet and classic Angus character and I expect his sons to carry that forward in their progeny.

A stout and powerful son of OCC Joker 620J, 6172S has proven year after year his ability to sire moderate, efficient and functional cattle ideal for grass utilization. The HD50k dna test validates his genetic propensity to convert less feed into more pounds. With over 60 daughters in production here, it is evident they are the most efficient and productive. Utilize a Joker for their maternal potential, favorable carcass traits, and conversion efficiency – proven genetics for any grass-based outfit.

0505X pedigree consists of multiple generations of top females known for fertility, udder composition, and adaptability. He easily stamps his progeny to fit any grass-based program; siring easy fleshing, forage efficient cattle that will thrive in even the harshest environments. He has bred 346 cows naturally in the past 5 years; obviously possessing exceptional libido and is highly fertile, testing 96% as a 5 year old bull.

One of the best parts about 0505X is his outstanding dam and the cow family behind him. His donor dam, Rev Erica 5752R, is a true 1350 lb cow; a moderate, easy fleshing, good footed daughter of OCC Joker 620J. Her udder is typical of the Joker-bred females and sets the standard for quality with small well placed teats, and snug rear and fore udder attachment. 0505X isn't a terminal performance sire yet he has sired our high selling bull in both 2015 and 2016, averaging \$32,000. This line has proven its ability to sire added capacity, appetite and conversion, and super sweet udders on the daughters. Moderate, efficient, maternal – not just buzzwords.

Impressive phenotype and genotype describes 161 who has proved to be a reliable source of herd building genetics. There is no guesswork with this bull: his Pathfinder donor dam, 463 has not missed posting a WWR 7@110, YWR 7@106, IMF 6@110, REA @100, and her grand

dam was still in production at the age 18. His sire is the result of mating the standard for performance and longevity, Rito 707, with an N-Bar donor who was still in production at the age of 17. His daughters are establishing themselves as productive brood cows with the wedge shaped look and nice tidy udders. Utilize these sons for their genetic merit to sire great replacement females and steer calves with added stature, capacity and style.

0509X had a mature weight just over 2300 lbs and was a very efficient breeding bull. He sold as a sale feature in 2012 to Dave Hanson of Eastend, SK. Dave has a knack for picking good bulls and his cowherd is reflective of that selection, so when he said the calves of 0509 were good, it was negotiated the bull had to come home. 0509's dam has earned weaning and yearling ratios of 101 and 109 on nine calves, and his granddam 669K had her 15th calf recorded in 2016. 669K's sire, Tomwall Pied Piper 413, is a sire also found in Crowfoot Equation's pedigree known for exceptional daughters. Utilize 0509X sons for their combination of low birth weight, responsible mature size and bred-in, not fed-in, natural muscle expression.

3RC3 is a long made, attractive herd sire that is very correct in his overall stature. He has exceptionally balanced performance data for BW, WW, YW, SC and ultrasound for %IMF and REA. His first daughters are coming into production this year; very feminine and should emulate Brokers' Pathfinder dam who posts a production record of BW 4/100, WW 4/108, YW 4/105, %IMF 3/107 and REA 3/106. His progeny display many traits that help make ranchers profitable; and his sons should make excellent heifer bulls that sire calves that come easy with extra vigor at birth and then grow.

1254 was a bull with a lot of characteristics that lined up well for a grass-based system. Lost in a bull fight this year he had ample natural thickness, excellent structure and good feet. I saw his dam sired by OCC Anchor in the fall of 2015 down in Stillwater, OK and if you had a herd of cows like her you would be realizing some real net profit per acre. His sire, Duff Angus, realized a lot of semen sales to Argentina. I fully anticipate his sons will be around for a long time for whoever gets them. They have the structure to cover the big country, service a lot of cows per year, and the type and pedigree to gain weight while doing it.

Exquisite has a pedigree complimentary to the Rito bred cattle. He is a product of the Sinclair embryo program that combines N Bar Emulation EXT, a sire with more than 18,000 registered daughters on record making him one of the most highly proven sires of all time; with DHD Traveler 6807's full sister. 6807 was another unique sire of maternal excellence and added fleshing ability and a large percentage of bulls in this sale trace back to 6807. In today's chase for unproven outcross maximums, pedigrees like Exquisites are harder to find because of the time required to create true lines of cattle – but they are predictable and they are what keep us in business long term. If at all in this for the long term, utilize the Exquisite sons for their timeless maternal traits.

An Exquisite heifer bull candidate with an 82 lb BW & BW EPD of only 1.4 with strong post-weaning gain who combines some really good cows in his pedigree.

## CATTLE CHUTE SCORE

**Score 1- Docile** Mild disposition. Gentle and easily handled. Stands and moves slowly during processing. Undisturbed, settled, somewhat dull. Does not pull on headgate when in chute. Exits chute calmly.

**Score 2- Restless** Quieter than average, but may be stubborn during processing. May try to back out of chute or pull back on headgate. Exits chute promptly.

**Score 3- Nervous** Typical temperament is manageable, but nervous and impatient. A moderate amount of struggling, movement and tail flicking. Repeated pushing and pulling on headgate. Exits chute briskly.

**Score 4- Flighty (Wild)** Jumpy and out of control, quivers and struggles violently. May bellow and froth at the mouth. Continuous tail flicking.

**Score 5- Aggressive** May be similar to Score 4, but with added aggressive behavior, fearfulness, extreme agitation and continuous movement.

**Score 6- Very Aggressive** Extremely aggressive temperament. Thrashes about or attacks.

**Cattle with Chute Score of 5 and 6 should be culled.**

## EPD EXPLANATION

EPD's are predictions on how each bull rates against his own contemporary group and the rest of the breed. EPD's evaluate group averages and offspring's performance, however they cannot predict individual performance or weights.

For example, if Bull A (WW EPD of +10) & Bull B (WW of +60) were randomly mated with 10 similar cows, we would expect the group avg. weaning weight of Bull A's offspring to be 50 lbs. lighter than Bull B's (60 - 10 = 50).

BW	Birth Weight - expressed in pounds, is a prediction of a sire's ability to transmit birth weight to his progeny.
WW	Weaning Weight - expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny.
YW	Yearling Weight - expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny.
Milk	A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters.
TM	Total Maternal - 1/2 Weaning Weight + Milk. This index is the expected amount of pounds that a sire's daughters' calves will differ from the breed average assuming the daughters are mated to sires of average genetic merit for Weaning Weight.

**BLACK ANGUS EPDS & RED ANGUS EPDS should not be compared across the board to each other.**

## BREED EPD AVERAGES

Red & Black Angus Breed Averages are compiled from the total number of Red Angus calves registered in 2016 to compare the RED & BLACK ANGUS BULLS in this catalogue to:

	BW	WW	YW	Milk	TM
<b>BLACK ANGUS</b>	+2.1	+45	+80	+21	+43
<b>RED ANGUS</b>	-0.4	+53	+78	+17	+44
