CHAPMAN CATTLE COMPANY FORAGE-DEVELOPED 2 YEAR OLD ANGUS BULL SALE 2021

February 18, 2021 | Stettler Auction Mart, Stettler, Alberta

TERMS AND CONDITIONS

sale professionals

Don Raffan, Auctioneer 250-558-6789
Joe Ferris, Ringman 250-558-8745
Gary Rairdan, Ringman 403-588-0913
Blake Chapman 403-741-5760

bids

Buyer may call or send their bids to any of the sale professionals listed above or directly to Chapman Cattle Company. Complete satisfaction is guaranteed for cattle purchased sight unseen as well as all bulls sold.

terms & conditions

All cattle sell under the standard terms and conditions of the Canadian Angus Association. Terms of the sale are cash, payable on Sale Day unless prior arrangements have been made with Chapman Cattle Company.

insurance

Ownership risk to purchaser commences when the Auctioneer's hammer falls. All cattle returning to Chapman Cattle Company must be insured. Although all precautions will be made for the well-being of your cattle until possession has transferred, Chapman Cattle Company will not be liable for any sickness, injury or death that causes loss of use of the specified cattle. A Livestock Insurance agent will be available Sale Day to discuss your coverage options.

announcements

All announcements from the sale block on sale day take precedence over any printed material.

food

Coffee and donuts in the a.m. Lunch will be provided and served starting at 12:00 p.m. Hospitality after the sale.

hotels

Canalta Hotel, Stettler 403-742-3371
Ramada Inn, Stettler 403-742-6555
Super 8 Motel, Stettler 403-742-3391
Heartlander Motel, Stettler 403-742-3401

liability

All persons who attend the sale do so at their own risk and the owners, management, and Sale Day staff assume no liability, and disclaims all liability, legal or otherwise, for any reason.

health

All sale bulls have been vaccinated twice with Vision 8 Somnus and Vista Once; bolstered with Express FP 5-VL5; treated with Ivermectin, Cydectin and SafeGuard; supplemented with MultiMin 90 and Vitamin A/D; and fertility tested by Dr. Jackie Dobinson.

storm date

FEB 19, 2021 | 1PM | Stettler Auction Mart

In the event of a weather event, updates will be posted at www.chapmancattle.com or call the Stettler Auction Mart 403-742-2368 or Silas Chapman 403-741-2099.

delivery

Upon Settlement, please choose one of the following options and inform the clerk at the time of settlement. Please leave detailed delivery instructions upon doing so.

A: **\$100 discount** per bull if bulls are picked up sale day.

B: **\$100 discount** per bull if bulls are picked up within a week of the sale.

C: **Complimentary Delivery**

Every attempt will be made to deliver your new bull(s) as close to your bull pen as possible for bulls selling within the prairie provinces and B.C. Any U.S. purchases will be delivered to Billings, MT. Delivery will commence in March. Chapman Cattle

Company assumes no liability of death or injury for bulls returning to the ranch or in transit on a private or commercial carrier.

sight unseen purchases

Can't make it to the sale? We guarantee you won't be disappointed in a Chapman "Forage-Developed" bull that you buy "sight unseen". In fact, we sell many bulls every year this way. Our experience over the past 70 years is the sooner you contact us, the better we are able to match the right cattle to your specifications. When cattle purchased sight-unseen are delivered, the buyer has the right of refusal for any animal that is not as they were represented. Guarantee applies only to cattle discussed with a Chapman Sale Professional prior to the sale.

guarantee

We're confident that our 'Forage-Developed' bulls will meet and exceed your standards for longevity and performance. If for any reasons you're not satisfied with a bull you purchase from us, you don't have to pay - just call us for a prompt and courteous credit or refund. Any claims are to be made by October 01, 2021.

follow up & consulting

We are interested about your program too, your success, and the effectiveness of our cattle in your herd. Feel free to contact us at any time.

Call us at (403) 741-2099, email us at silas@chapmancattle.com or through our website at www.chapmancattle.com.

Complete Bull Information available online including catalog, video, individual performance, EPD's, sale weights and scrotal measurements at: www.chapmancattle.com.

Please let us know if we can provide you with any additional information or assistance. We look forward to seeing you on sale day!

Welcome to our Annual Forage-Developed Bull Sale

and thank you for your interest and investment in the genetics we bring forward every year. Over the course of three generations and 71 years we have been developing and marketing 2-Year-Old bulls exclusively. Within that time our philosophy to breeding cattle really hasn't changed: avoid any shot-gun approach to genetic selection, avoid chasing fads, and remain steadfast in maternal genetic selection.

As cattle producers, we all have access to the same genetics annually. We have focused on stacking proven genetics that are like-in-type; while allowing the environment to sort through the genetic base we have, or have accessed, in order to determine the replacements we keep and the bulls we sell. This has resulted in a multi-generational product that breed true in both genotype and phenotype.

The phenotype of our cattle has moderated over the past two decades, and this is directly attributed to the cows matching the environmental pressure we place on them. However, the percent body weight weaned per cow is now higher. If we were a commercial cow/calf outfit we would have the ability to run more cows per acre with the option to initiate a terminal crossbreeding system to increase yield. The ideal cow size and weight has been highly debated; but as a whole the smaller cow should contribute more to your gross margin.

Within the footnotes in the catalog you will notice a lot of research on the cattle "behind the bull" with the intention of providing familiarity of bloodlines and the production and longevity of the maternal dams. We recommend that before you buy a bull anywhere, familiarize yourself with their cowherd, their breeding objectives, and their long-term philosophy. There is no way around it, your cowherd inherits its genes from where the herd sires are sourced from, and that can have a profound financial impact on your program for years.

With that, the sale offering represents a cross section of proven maternal genetics. All reference sires have daughters in or coming into production this year. Our bulls breed bigger than you'd think, with bulls from past sales having sired feeders that fit in grass-based branded beef programs; sired steers excelling in grain-fed carcass trials; sired division winners from 4-H to Agribition; and sale highs for us and fellow breeders alike. Most importantly, those bulls sired maternal function, with customers returning because those Chapman-sired cows "lasted a long time".

The bull offering is uniform and consistent – quality sells throughout, and now includes a selection of SimAngus bulls. We are confident in the genetic package we are selling on Thursday, February 18th and are available 365 days a year to assist you with your purchases. Thank you in advance for your interest and consideration.

Progeny Birth Weight Averages: Male 86 lbs | Female 79lbs

In search of an outcross pedigree that offers a phenotype similar to ours, we chose 749 as one of the higher dollar bulls in the spring '18 Sitz Bull Sale. He posted a BW 87, WW 775, YW 1340, and YSC 40; and is a result of an embryo mating between the highly proven Basin Payweight 1682 and the Pathfinder donor Sitz Forever Lady 612T. She is also the mother behind Sitz Reload 411C. True to the 1682 downline, his progeny are wide-based, deep made cattle with a marketable phenotype.

DAM'S PROD

BW	WW	205	WR	YR	AOD	NR
96	795	782	122	116	8	110

Herd bull candidate who has excelled in every category. Projected to be the heaviest Angus bull sale day, Lot 01 carries forward the Payweight depth of body, the added Rito performance, and the Emblazon doability. His dam is built to last and following in the footsteps of her donor dam who is still active at age 19 and earned a NR 13/104. Same cow family as the good Lot 14 bull.

90	640	630	99	99	7	99

Lot 03 will be one of the heaviest bulls by sale day and achieved this accelerated gain over the summer and fall on pasture. His dam is the right kind of cow and maintains a CI of 364d who is bred back early to Titanium. Looking at our cowherd data, the statistical distribution of cows that have the most longevity (outliers aside) maintain nursing ratios between 98-104.

These Payweights exhibit a body type we desire for a low input system and will be fresh genetics for many. The maternal side of Lot 04's pedigree reads "cowmaker" with Right Time and Joker. His dam has already raised 2 sale-qualified bulls, this is her 3rd with a full brother slated for 2022 while posting a 396d CI. Her granddam achieved Association Elite status, earning a NR 8/107.

Lot 05 has balanced EPD's below breed average for CE and MCE and is a bull I would consider for heifers or cows. His Montana-bred pedigree combines some proven genetics from Sitz, Cole Creek, Diamond D and the original Walling herd. Dam holds a 366d CI. The paternal granddam, 612T, is a Pathfinder in the American herdbook ("Elite" in Canada) recognizing cow productivity.

Lot 08 is above average in all categories and built to breed a lot of cows for a lot of years. His dam was sourced out of the Crowfoot Dispersal and this is her 4th sale-qualified bull with another 2 daughters retained. She is a cow with a bit more power and is bred back to Robust. The sire of Lot 04 has averaged 86 lbs and 79 lbs on his male and female progeny.

7141 was our pick and 3rd high selling bull out of the 2018 McCumber Angus Bull Sale. Statistically he is balanced with a BW 82, 205 754, WR 104, YW 1466, YR 111, YSC 38. More importantly, everything about 7141 indicates a cow maker. He is triple bred Sinclair Extra 4X13 and out of an outstanding OCC Tremendous 619T dam. He is a long-spined bull, highly fertile covering 80 1st calvers this year and is structurally hard to fault. His 1st daughters look great.

DAM'S PROD

BW	WW	205	WR	YR	AOD	NR
88	775	772	121	115	8	106

Lot 11 hit the mark in every measurable trait. He weaned off as one of the heaviest bulls and will be one of the heavier bulls sale day. What is neat is the high percentage weaned of her own body weight that his smaller-framed dam achieved, while holding a 359d CI and a NR 7/106. It's no surprise though as she is a Legacy daughter known for their fertility, longevity and productivity.

EPD EXPLANATION

EPD's are predictions on how each bull rates against his own contemporary group and the rest of the breed. EPD's evaluate group averages and offspring's performance, however they cannot predict individual performance or weights.

For example, if Bull A (WW EPD of +10) & Bull B (WW of +60) were randomly mated with 10 similar cows, we would expect the group avg. weaning weight of Bull A's offspring to be 50 lbs. lighter than Bull B's (60 - 10 = 50).

BW	Birth Weight - expressed in pounds, is a prediction of a sire's ability to transmit birth weight to his progeny
WW	Weaning Weight - expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny
YW	Yearling Weight - expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny.
Milk	A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters
CE	Calving Ease Direct (CE), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.
MCE	Maternal Calving Ease (MCE) is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

84	615	595	93	95	6	100

Calving ease prospect that will be in the mix for sale day weight. His Emulation-bred pedigree should be ideal for heifers for these reasons 1) low birth weight 2) high fertility 3) heightened newborn calf vigor 4) correct calving ease phenotype. His dam holds a 366d CI and the next 5 cows behind her have earned NR 8/101, 10/105, 8/105, 111/109 and 10/106 respectively.

BREED AVERAGES

Black Angus Breed Averages are compiled from the total number of Black Angus calves registered in 2019 to compare the **BLACK ANGUS BULLS** in this catalogue to:

We retained five bulls out of the 2014 calf crop. Those five were all out of what we considered paternally prepotent dams that were proven and donor worthy. 4547B was one of those five and out of the 5900R donor who earned a NR 12/103 who also produced the Memento 0511X herd sire. Interesting that 4547 is a naturally sired son of Crowfoot Equation 5793R who ran here with 50 cows as a 9-year-old bull. The first Crowfoot Equation daughters are now entering their 14th year and easily make an argument to going back to using the old bull, or his downline.

By design, Lot 13 has achieved in every measurable trait and will do so right up to sale day where he is projected to be one of the biggest bulls. His young dam is off to a great start and bred A.I. early to hold a 363d CI on two calves. Her dam (NR 3/110) also has a son in the sale in Lot 72, while her granddam (NR 10/110) has achieved Elite status and has the Lot 52 in this sale as well.

77	595	623	98	98	2	98

Calving ease prospect out of a first calf heifer. Lot 17's sire had a lot of positive traits that these sons have inherited – tight sheathed, good feet, classic Angus skull, proper scrotal shape and high fertility – traits often overlooked in search of performance. The Bandit daughters are wide-pinned and hold a little more backfat ensuring reduced costs. Old predictable Montana genetics.

752 has a unique and proven maternal lineage, being sired by Papa Forte known for several profit-oriented traits such as calving ease and calf vigor: as well as moderate framed, easy fleshing females with good fertility. Add in the legacy of the Donna 714 donor and 752 has a pedigree by design for moderate, functional and fertile Angus females. 752 bred 65 cows as a 2-year-old and looked great doing it. Unfortunately, he broke a leg in a bull fight the day before he was to go to stud. Expect a much bigger group of sons in next years' sale.

Calving ease prospect that came off his dam in good rig. EPD's read below breed average for calving ease and above breed average for performance. His sire was used on heifers and cows. His dam is a big bodied cow who milks good and was used to carry embryo's. She has 3 daughters retained and is the grandmother of the Lot 54 bull. Pedigree designed to fix cow type.

Progeny Birth Weight Averages: Male 85 lbs | 79 lbs

5197 isn't a big frame bull, but his width of base, natural thickness and overall mass is evident. He earned an actual weaning weight of 815 lbs; and gained over 4 lbs/day to earn a 365-day weight of 1431 lbs while scanning a REA of 16.0sq. in. As evident by his Heifer Pregnancy EPD in the top 15% of the breed, his downline should have added fertility. His dam is a Pathfinder and stems from multiple generations of proven Miss Wix females. 5197 combines a lot of economically relevant traits that will enable his downline to thrive in a low input environment.

My recommendation to shift a group of cows to a more maternal, low-input system and follow that up with a terminal sire would be to put together a group of these closely bred Titanium sons. The dam of Lot 38 did a good job carrying him through to weaning as indicated by his actual weight. She has always calved 1st cycle but has jumped to the front of the 1st cycle.

BC Robust 0807 was the high selling bull sourced out of the 2017 Conley Angus Bull Sale. He was the lead off bull in the Champion Yearling Pen of 3 bulls at the 2017 NWSS. He is a very balanced bull: long spined, big hipped and very photogenic in a 5 frame. Perhaps his greatest asset is how he stands down on all four corners on a good foot. An injury on day one of turnout limited him to the last week of breeding in 2018; but he has bred 70 cows in each of 2019 & 2020 with a son also retained from the 2018 calf crop. More sons on the way for 2022.

In 2014 we bought four of the top bulls from Cole Creek Angus. The Goldmere 581 bull was the most consistent, so when the high selling bred heifer out of the Crowfoot Dispersal had a son as her first calf, we bought him. His progeny exhibit added docility, scrotal and have very sound feet and a lot of middle. His daughters also exhibit extra pelvic width. He ranks high for Milk and Total Maternal EPD's, yet that added maternal capacity does not draw them down in condition in the fall. Lots of traditional Angus characteristics.

84	695	672	105	104	10	98

Calving ease bull and statistically almost a performance twin to Lot 44. The Bandits were well accepted in the past sales and have traditional Angus characteristics and the extra docility for those who require it. Almost a Crowfoot pedigree, this is his dam's 3rd sale qualified son and her productivity is supported by her maternal granddam who achieved Elite status, NR 10/102.

Herd Bull candidate. Lot 46 will be found sale day and is out of one of my favorite cows in type and for her perennial productivity. This is her 6th sale qualified bull with every daughter retained. Her productivity is no mistake as she is a part of the K Pride tribe. The first 4 maternal dams in his pedigree, including the dam, have earned nursing ratios of 10/105, 8/105, 11/109 and 10/106.

94	660	695	108	107	12	100

Cow bull who will be one of the heavier bulls on sale day. Dallas Jensen always said as long as the weaning ratio is greater than the birth weight, you'll be fine on these bigger bulls at birth. Lot 47's dam was going strong at the age of 13 until she acquired a stifle injury this fall. She reminded me of the classic big range Angus cows. Her dam had a NR 9/107 and her dam 10/99.

DAM'S PROD

BW	WW	205	WR	YR	AOD	NR
82	713	745	112	102	11	106

Calving ease Bandit who is long and thick with solid performance data and most importantly, is backed by a good cow. In fact, 8003U was my favorite Joker daughter, and we had a lot of them. She had earned a NR 10/106 with a 363d CI and was as sound as they come but got tipped downhill on a bedding pack last spring. Her dam was a smaller, fertile cow with a NR 11/101.

These Bandits are a result of multi sire pasture breeding. DNA results show the sire of Lot 43-53 as siring the highest % of calves among 4 other sires. If a bull has sub-par libido or sub-par fertility and isn't doing his job, it doesn't matter how big his weaning weight was or how much he cost. We expect our herd bulls to breed large groups every year – it helps if their sire did too.

Progeny Birth Weight Averages Male 86 lbs | 80 lbs

"268" was acquired from Crowfoot Cattle as their high selling Angus bull in 2013. He is a bull that worked his way up the ladder, initially being used in a multi-sire pasture, to a few consecutive years as a heifer bull, and then on to mature cows. He sires a big middle in his progeny, and they are easy keepers and easy to work with. At the age of 9, he was still very sound and stood down on all four corners with a big hoof with very good shape. His dam and maternal grand dam both earned Elite status with the Association.

88	700	683	107	105	8	107

Lot 63 is a bull that will work on larger heifers or cows. His lineage and EPD's reinforce his calving ease potential but his actual birth weight may be over the threshold for some. I lean towards calving ease versus actuals; but weigh both accordingly. His dam was purchased as a winter calving cow, and moved into our spring calving, therefore skewing her calving interval.

DAM'S PROD

BW	WW	205	WR	YR	AOD	NR
88	695	683	107	105	7	107

Last call on 268Z sons who have sold to good purebred and commercial herds for years. Lot 64 is similar to Lot 63 - a little more birth weight to be called a heifer bull, but would classify as a calving ease cowmaker. His dam holds a 372d CI and traces to Emulation 3 times and OCC Legacy in her immediate pedigree. Her dam and granddam have a NR 8/101 and 11/99.

"SIGHT UNSEEN PURCHASE PLAN"

We would prefer to have everyone in attendance for sale day, but realistically we know there are scheduling conflicts and distance limitations. Regardless of the situation, we handle many sight-unseen bull purchases every year, and have successfully placed cattle into 6 provinces this way. Almost every one of those original sight-unseen purchases has resulted in repeat orders. In fact, of all the bulls sold sight-unseen, we have only had to bring 1 bull home! We know the cattle well, and realistically some of our customers prefer to allow us to select their bull power for them. Please contact Silas, to discuss your bull requirements.

100% Satisfaction Guaranteed!

Sometimes in the purebred world, the good cattle aren't too far from home. DMM said they had a bull that would fall in line with my desired phenotype. I had seen 11E's sire in stud and really appreciated his overall type and foot structure for a big bull. Plus, 11E stems from the Miss Essence cow family that includes the 2012 Show Female of the Year, so I drove the 20 minutes over to Bashaw and purchased him after seeing his dam. An outcross to everything we have, the Gustov bull complimented the cows he received, and the foot quality is evident.

87	750	718	112	109	12	104

Herd bull. Wide top, good feet and statistically on the mark. Outcross pedigree for many. The best part of Lot 65 is his dam. Entering her 14th year in 2021, she has now earned donor status after 8 sale qualified sons, including two consecutive high sellers in 2016-17. Her dam earned a NR 9/101. Combine that with the Miss Essence cow family on top. Some of the best in Lot 65.

We retained five bulls out of the 2014 calf crop. Those five were all out of what we considered paternally prepotent dams that were proven and donor worthy. 4547B was one of those five and out of the 5900R donor who earned a NR 12/103 who also produced the Memento 0511X herd sire. Interesting that 4547 is a naturally sired son of Crowfoot Equation 5793R who ran here with 50 cows as a 9-year-old bull. The first Crowfoot Equation daughters are now entering their 14th year and easily make an argument to going back to using the old bull, or his downline.

Coalition is one of the best kept secrets here and has created a proof of production the old school way; having ran in multi-sire groups his first two years. Coalition has a herd bull look and possesses as good a foot shape as I've seen on a 7-year-old bull. He looks a lot like his Pathfinder sire, Sitz Alliance 6595 at that age, and carries the maternal legacy of two generations of Lady Erica donors. His daughters have great udder structure – maybe our best.

Calving ease hybrid bull. When I mentioned Stratton 1531C was exposed to an entire age group of registered Angus cows I wasn't kidding. The dam of Lot 78 is an embryo daughter of Lady Erica 8984 and OCC Legacy 839L. She is the right size of cow, has a 351d CI and a NR 2/105. She rebred early to her A.I. service after weaning a top Coleman Forte daughter.

BW	WW	205	WR	YR	AOD	NR
85	670	711	111	108	3	111

Calving ease hybrid bull. The Stratton calves all came unassisted and smaller at birth suggesting early gestation. The sister mates to these ¾ Angus ¼ Simmental bulls all look the part. Lot 79 stems from the Pride cow family known for its productivity and ability to put bulls in the sale. Same cow family as Lot 16. His dam has a NR 2/111 with a 347d CI and rebred A.I. for 2021.

81	700	828	130	122	3	116

Calving ease hybrid bull with a big birth to weaning spread. His dam would also have weaned a large percentage of her own body weight; and is off to a great start with a NR 2/116 and a 392d CI. She stems from the Chloe cow family ensuring fertility, udder quality and longevity. She weaned a good Coleman Forte bull calf this past fall and is rebred A.I.

Hybrid cow bull with the Angus look. His dam is the product of our embryo program combining the performance sire Rito 9R7 with the Lady Erica 3785N donor. She is a direct daughter of the Lady Erica 8984 donor who is behind Lot 78. The 8984 cow produced natural calves until the age of 18. Lot 81's dam holds a 361d CI and a NR 2/109. She is also rebred A.I. for 2021.

Calving ease hybrid bull that follows suit in low birth – accelerated gain – Angus phenotype – responsible frame – forage developed. His dam has a NR 2/113 and holds a 365d CI while being bred back A.I. The combination of Joker and Bandit ensure added doability. All of these hybrid bulls are docile, clean in their lines and have the Angus look.

Lot 83 is 1/2 Angus 1/2 Simmental and wasn't a planned mating, but rather the product of the neighbors registered Simmental bull climbing in with our registered Angus cows the day I was turning bulls out. Good thing they aren't afraid to spend money on top bulls. Big hiped, extra hair and bone. Dam has a NR 4/107.

Lot 84 is also a 1/2 Angus 1/2 Simmental; and like Lot 83 he isn't the product of a planned mating but from the same sire. Big hiped, extra hair and bone with a bit of chrome. His dam has a NR 6/106 and like the dam of Lot 83, was one of the early cycling cows. Not many if any forage-developed 1/2 bloods available – more bull for more years.

FOOT SCORE GUIDELINES

Foot Angle (5 is ideal)

1

Extremely straight pasterns.
Very short toe. Unsound.

2

Straight front and rear pasterns.
Marginally unsound.

3

Moderately straight front
and rear pasterns.

4

Slightly straight front
and rear pasterns.

5

Ideal. Approximately 45-degree angle
at pastern joint. Appropriate length of
toe and depth of heel.

6

Slightly shallow heel and long toe.

7

Moderately shallow heel and long toe.
Somewhat weak pasterns.

8

Shallow heel and long toe.
Marginally unsound.

9

Extremely shallow heel and long toe.
Extremely weak pasterns. Unsound.

Claw Set (5 is ideal)

Extremely weak, open,
divergent claw set. Unsound.

1

Open, divergent claw set.
Marginally unsound.

2

Moderately open/divergent
claw set.

3

Slightly open/divergent
claw set.

4

Ideal. Symmetrical claws, with
appropriate space between claws.

5

Slight tendency for claws to curl.
One claw may be slightly larger
than the other.

6

Tendency for claws to curl, with one
claw larger than the other.

7

Moderate scissor claw and/or screw
claw. Curling of one or both claws. Near
crossing of claws. Marginally unsound.

8

Extreme scissor claw and/or screw claw.
Pronounced curling of one or both claws.
Crossing of claws. Unsound
